

SPECIAL RELEASE

FRUIT CROPS SITUATION IN QUEZON:2025 (Preliminary Results)

Date of Release: 30 April 2026

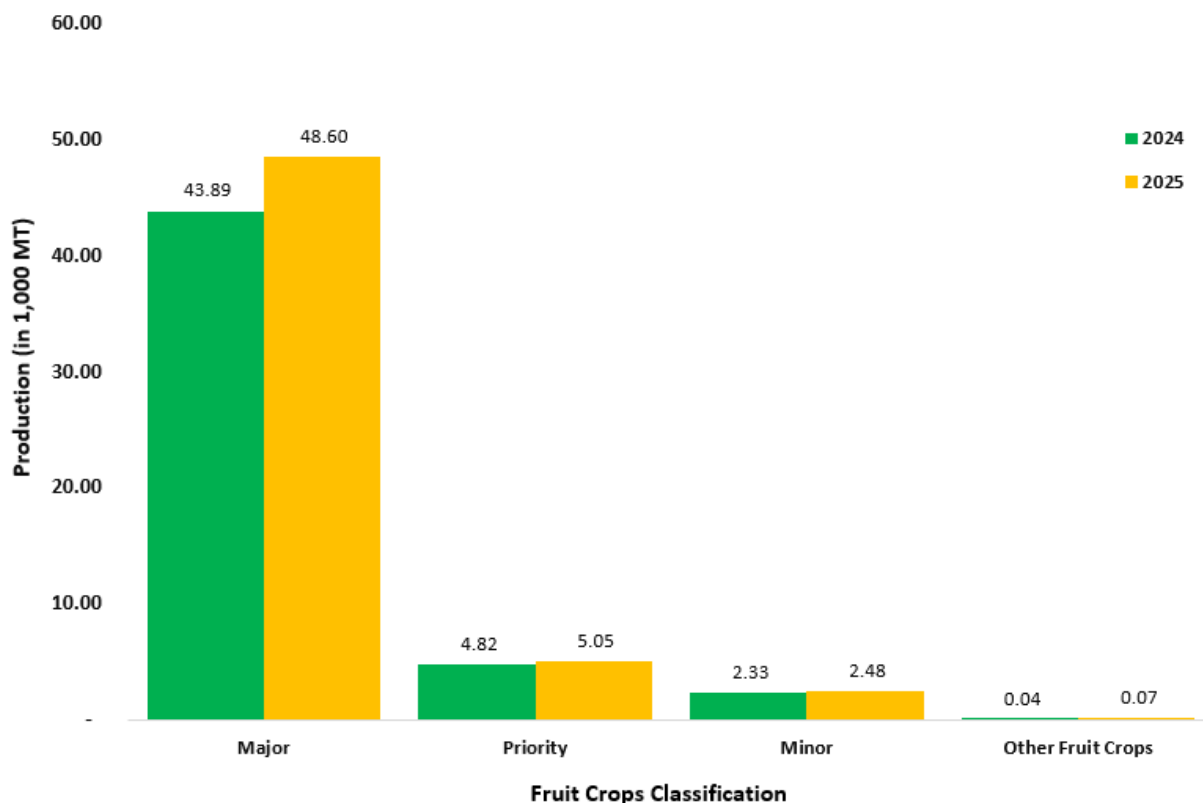

Reference No. 2026 - 098

Fruit Crops Production

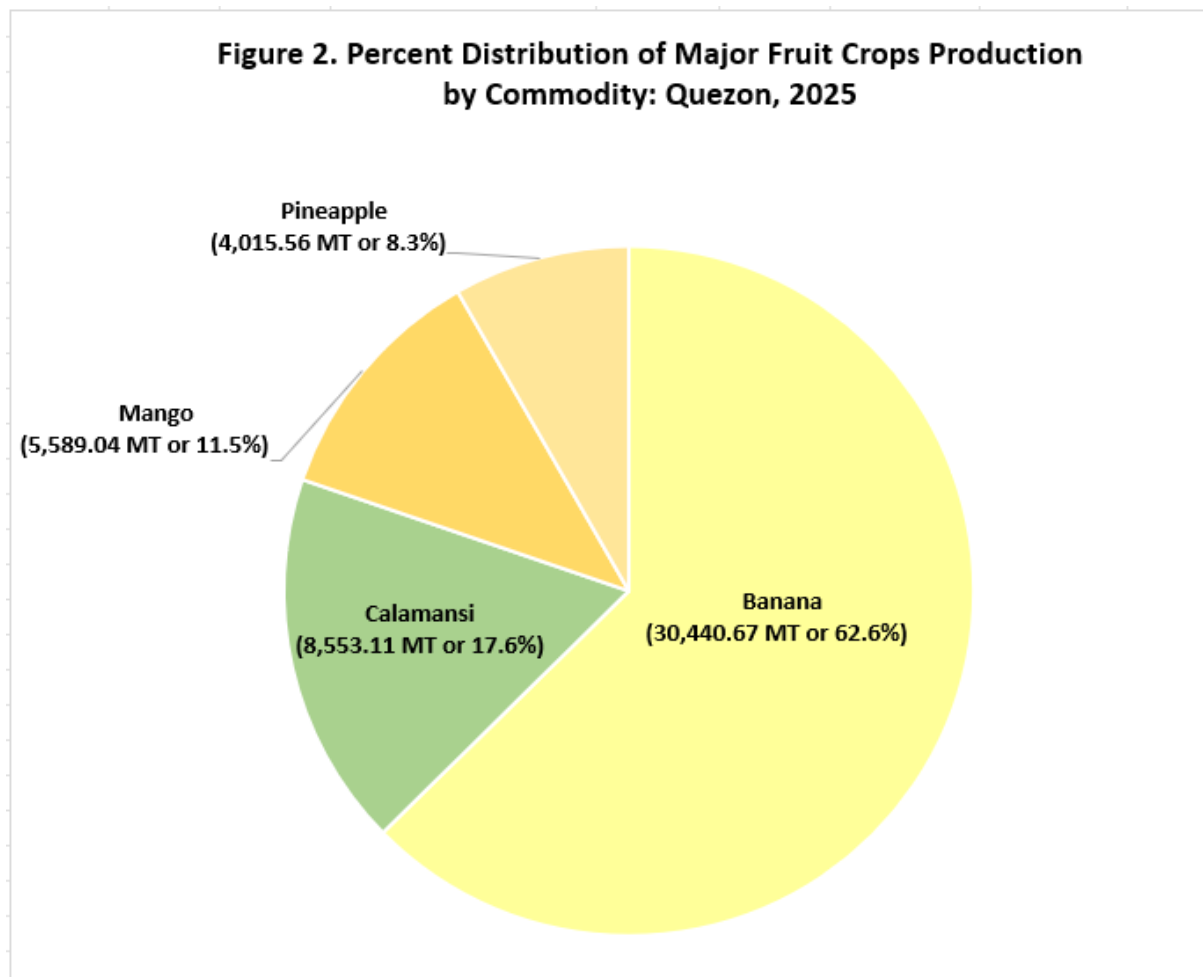

- A total of 56,189.00 metric tons of fruit crops were produced in the province in 2025. It went up by 10.0 percent from 51,072.30 metric tons in 2024.

**Figure 1. Volume of Production (in 1,000 MT) of Fruit Crops by Classification:
Quezon, 2024 and 2025**

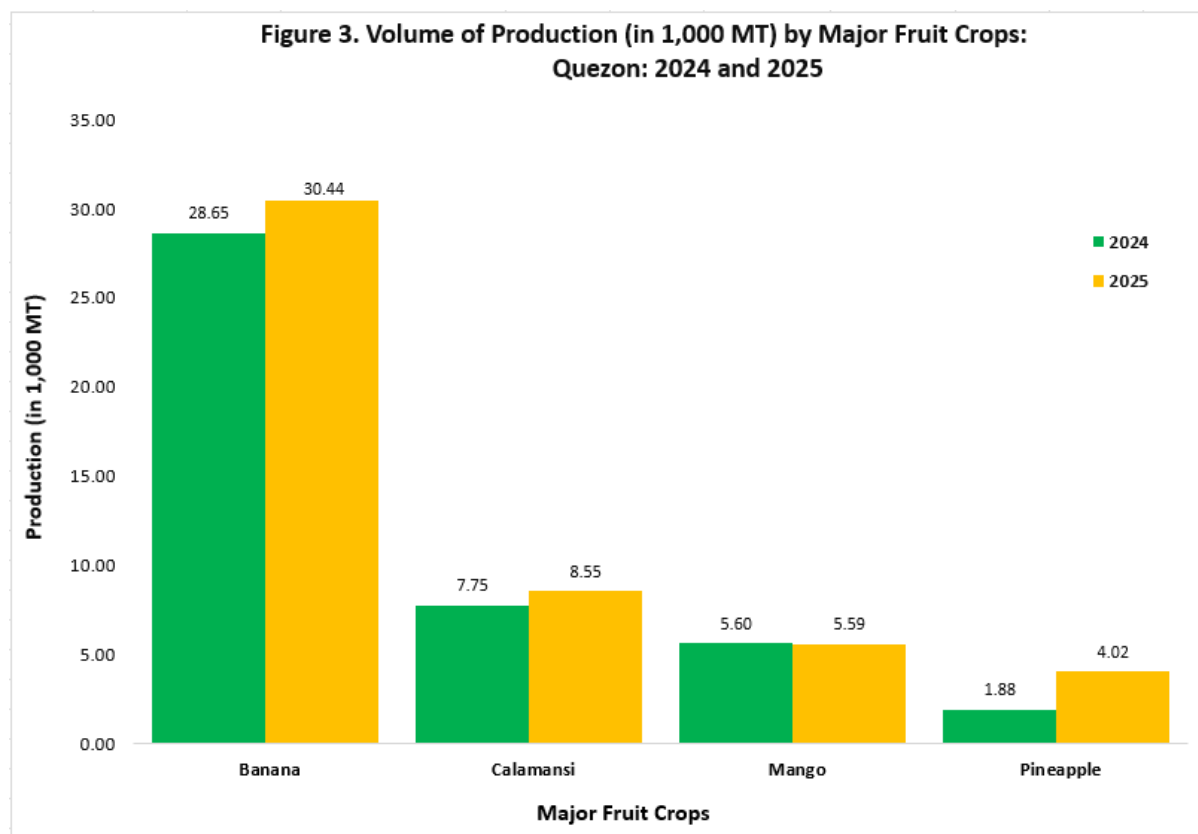

Major Fruit Crops

- The province produced a total of 48,598.38 metric tons of fruits under major classification in 2025. It increased by 10.7 percent from previous year's level of 43,886.62 metric tons.

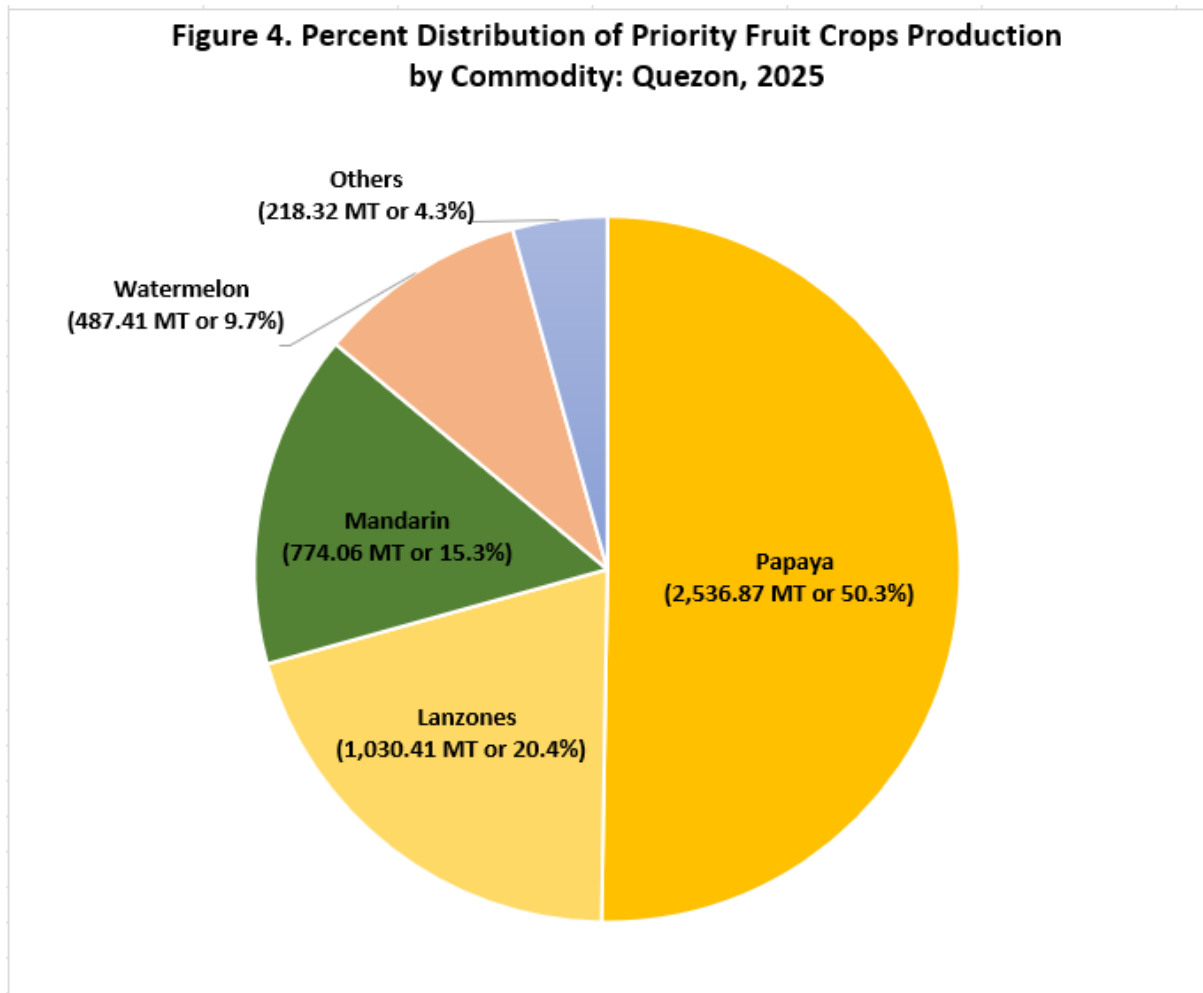

- Of the major fruit crops, banana contributed more than half of the total production with 62.6 percent. It was followed by calamansi, mango and pineapple with 17.6 percent, 11.5 percent and 8.3 percent, respectively.

- Banana production in 2025 was 30,440.67 metric tons which is higher by 6.3 percent from previous year's production of 28,649.66 metric tons. Of the total banana production in 2025, saba variety with 21,420.94 metric tons contributed the largest share of 70.4 percent. It was followed by latundan variety with 5,899.69 metric tons production or 19.4 percent share. Lacatan, bungulan and other varieties of banana comprised the remaining 10.3 percent.
- There were 8,553.11 metric tons of calamansi produced in 2025. It went up by 10.3 percent from the 2024 level of 7,753.95 metric tons.
- In 2025, mango production was 5,589.04 metric tons. It went down by 0.3 percent from 5,603.60 metric tons produced a year ago. Almost half (48.2%) of the total mango production came from mango piko variety. It registered a total production of 2,695.22 metric tons. Carabao variety had the second largest share of 46.2 percent or 2,579.72 metric tons. Other variety of mango comprised the remaining 5.6 percent of the total mango production during the year.
- Pineapple production increased to 4,015.56 metric tons, higher by 113.7 percent compared to previous year's level of 1,879.41 metric tons.

Priority Fruit Crops

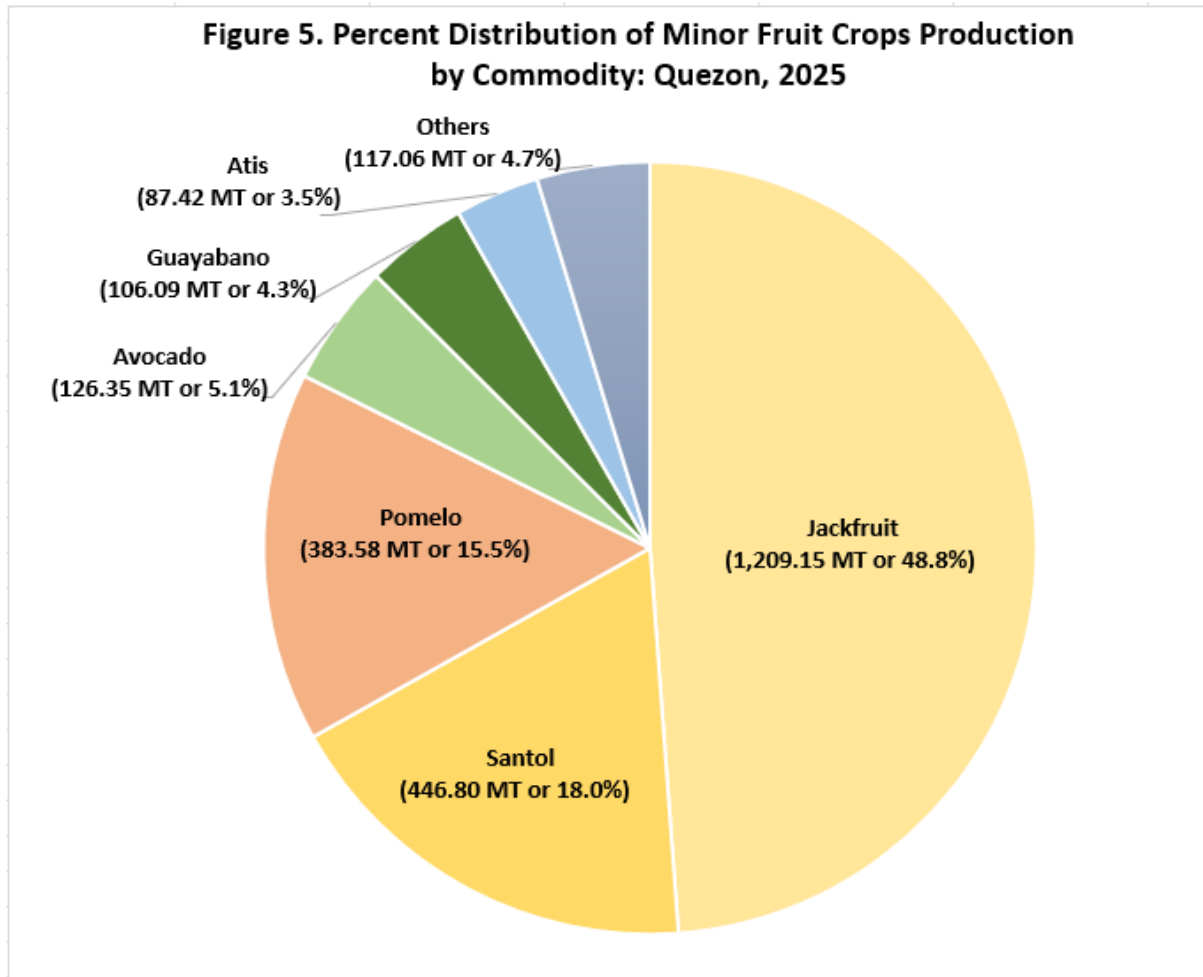

- A total of 5,047.07 metric tons of priority fruits were produced in the province in 2025. It increased by 4.7 percent from previous year's output of 4,819.03 metric tons.

- Papaya contributed 50.3 percent to the total production of priority fruits. It was followed by lanzones with 20.4 percent share. Mandarin and watermelon came next with 15.3 percent and 9.7 percent, respectively.
- The remaining 4.3 percent was composed of rambutan, mangosteen, tamarind and orange.

Minor Fruit Crops

- In 2025, the province produced a total of 2,476.45 metric tons of minor fruit crops. Prior year's output of 2,330.32 metric tons was lower by 6.3 percent.

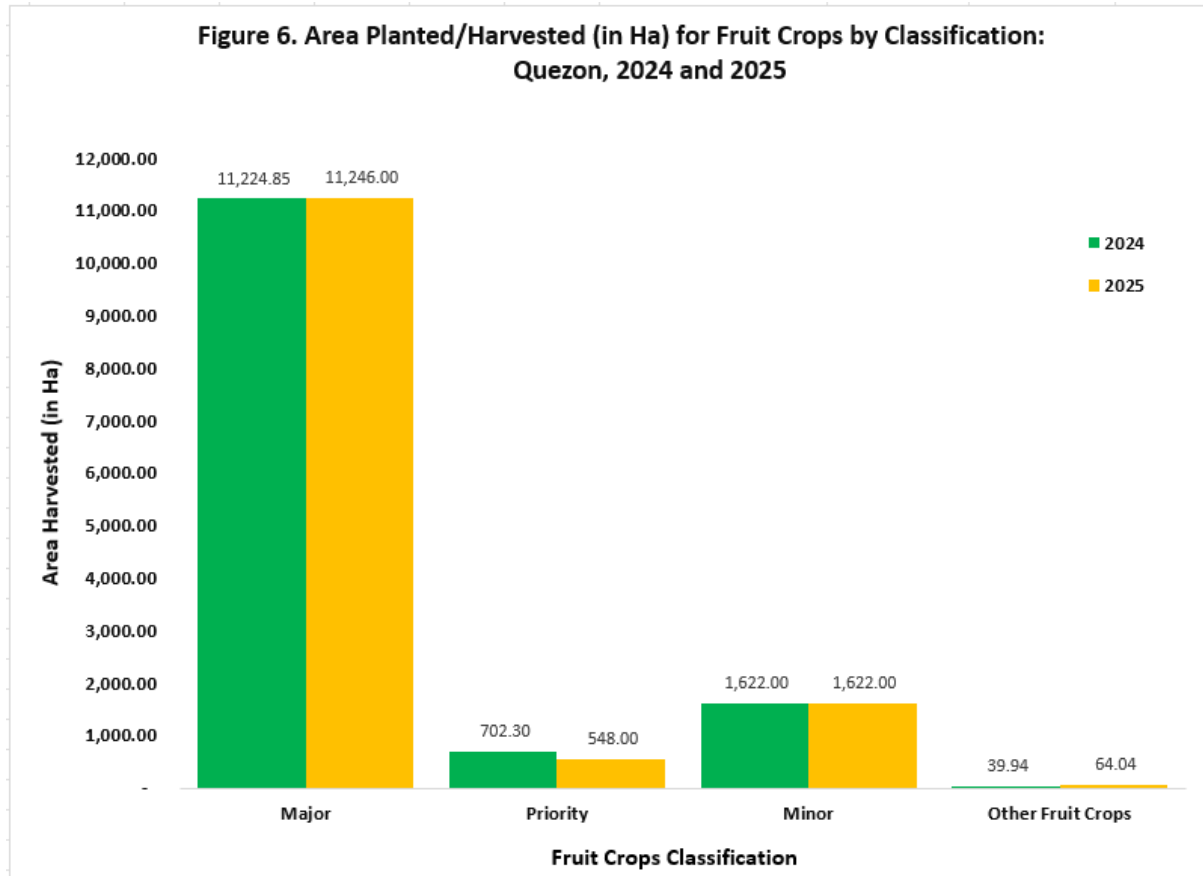

- Jackfruit contributed the biggest share of 48.8 percent to the total minor fruit crops production. It was followed by santol and pomelo with 18.0 percent and 15.5 percent share, respectively.
- Avocado (5.1 percent), guayabano (4.3 percent) and atis (3.5 percent) came next.
- Guava, sineguelas, duhat, chico and starapple comprised the remaining 4.7 percent.

Other Fruit Crops

- The province recorded a total production of 67.10 metric tons for other fruits. This production was 84.7 percent higher compared to last year's production of 36.33 metric tons.

Area Planted/Harvested for Fruit Crops

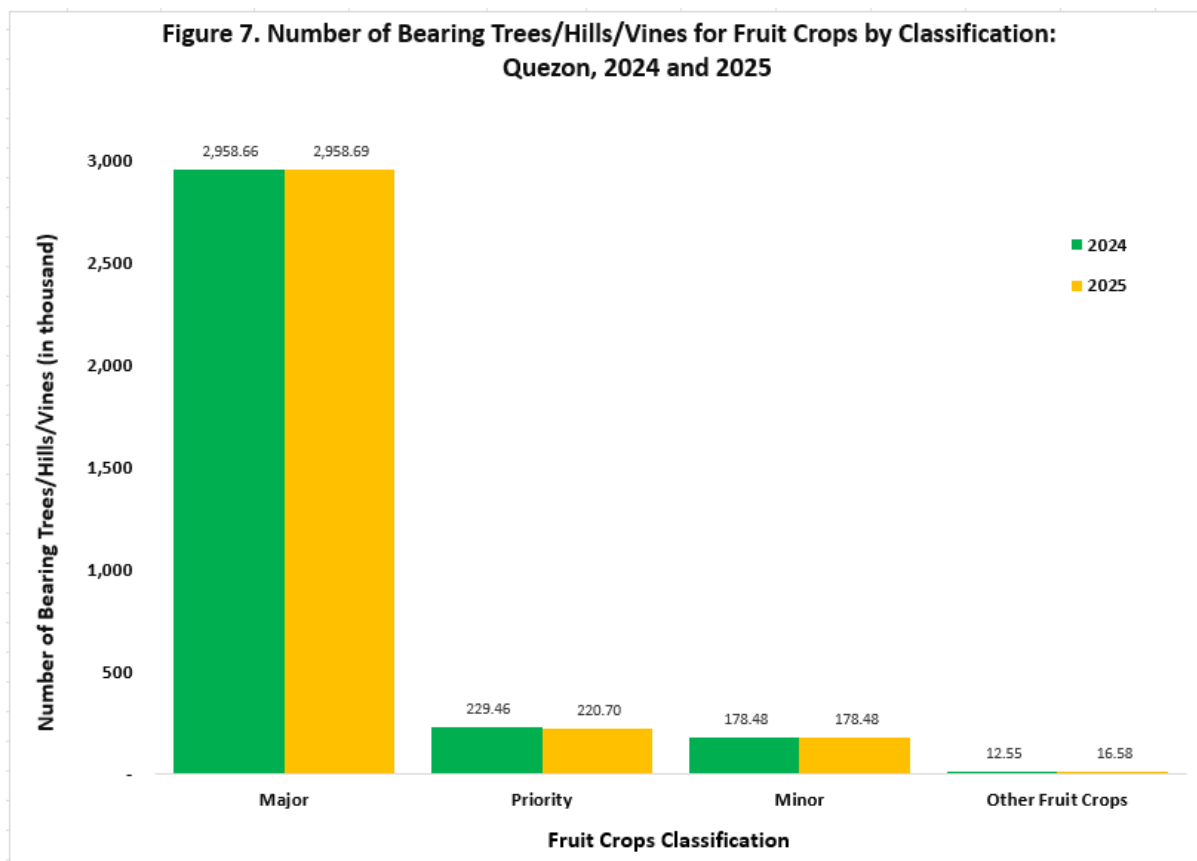

- In 2025, the area planted/harvested for fruit crops was recorded at 13,480.04 hectares. It decreased by 109.05 hectares or 0.8 percent from the previous year's figure of 13,589.09 hectares.

- Other fruit crops recorded the highest increment in area planted/harvested in 2025 with 24.10 hectares. It rose to 64.04 hectares in 2025 from 39.94 hectares in 2024.
- An increase was also observed in the area planted/harvested for major fruit crops with 21.15 hectares. The area planted/harvested for minor fruit crops remained unchanged.
- There was a big drop in the area planted/harvested for priority fruit crops at 154.30 hectares from 702.30 hectares during the previous year.

Number of Bearing Trees/Hills/Vines for Fruit Crops

- A total of 3,374,445 bearing trees/hills/vines was recorded for fruit crops in 2025. It went down by 0.1 percent from 3,379,157 trees in 2024.
- The reported number of bearing trees/hills/vines for major fruit crops increased from 2,958,664 trees to 2,958,689 trees in 2025.

- However, the number of bearing trees/hills/vines for minor fruit crops remain unchanged.
- An increase in the number of bearing trees was observed for other fruit crops from 12,549 trees to 16,576 trees in 2025.
- In contrast, the number of bearing trees/hills/vines for priority fruit crops went down by 3.8 percent in 2025, decreasing to 220,700 trees from 2024 figure of 229,464.

TECHNICAL NOTES

Crops Production Survey (CrPS) aims to generate basic production statistics for crops other than palay and corn at the national, regional, and provincial levels. It covers more than 200 crops of which 19 are considered major crops. This survey is undertaken nationwide on a quarterly basis. CrPS has three subsectors such as vegetable and rootcrops, fruit crops and non-food and industrial crops.

Crops Production refers to the quantity produced and harvested for a particular crop during the reference period. It includes those measured but damaged, stolen, given away, consumed, given as harvesters' share, and reserved. Excluded are those produced but not harvested for whatever reason/s.

Area planted is the actual physical area planted measured in hectares. This generally applies to area reported for permanent crops and multi-harvest temporary crops.

Area harvested is the actual area from which harvests are realized expressed in hectares. This excludes crop area which was totally damaged. It may be smaller than the area planted. In crops statistics, this applies to mono-harvest temporary crops.

Bearing trees/hills/vines refers to the number of trees/hills/vines where harvesting has been made in the past and may or may not have borne fruits (productive) during the reference period due to cyclical production pattern of the crop. Hills apply to banana. Vines apply to grapes and the like.
